• **Pressure and Temperature Limitations**
  
  **Maximum Working Pressures** - as listed above apply from -40 °C (-40 °F) up to the maximum operating temperature of 60 °C (140 °F).
  
  **Burst Pressures** - The hose burst pressures are equal to or more than the maximum working pressures × 4.

• **Vacuum Limitations**
  
  Usable at vacuum to -0.9bar up to 60°C (302°F).

• **Flexibility**
  
  Much less force to bend than any other smooth bore PTFE lined hose product.

• **Kink resistance**
  
  Good kink resistance, when compared to traditional smoothbore type products.

• **‘Rolling U’ Flex Life Test**
  
  More than 100 × the flex life to failure compared with all other types of smooth bore PTFE, FEP and PFA lined rubber covered hose products.

• **Flow rates**
  
  More than 2 times the flow rates for convoluted bore hose designs. Consult Aflex Hose for specific flow rate information.

• **Gas permeability**
  
  Reduced gas permeability compared with other PTFE lined hose designs, due to the heavy compression applied to the PTFE during processing which reduces porosity.
